LRN's Legal Compliance and Ethics Center (LCEC)

Web-based law and ethics education used by many major companies

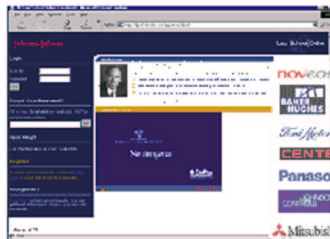

The LRN Legal Compliance and Ethics Center

Changing the Role of Law and Ethics

LCEC provides an integrated, Web-based solution for disseminating legal and ethical knowledge throughout the enterprise. With LCEC you can enjoy:

- A comprehensive curriculum
- Turnkey technology
- Data tracking that monitors the effectiveness of your program

And since LCEC is offered on an Application Service Provider (ASP) basis, your department is freed from technical issues and can focus on meeting your business challenges.

Company Overview

Web i18n, LLC is a new and innovative California-based company producing visually dramatic real estate web sites. Web i18n was founded by Charles C. Fu and Eric Bloom, and obtains its technical expertise and management experience primarily from these two individuals. Web i18n is much more than a developer of real estate web sites: it is an applications development company that combines state-of-the-art technical expertise, multilingual tools, client-specific content, and an established relationship with a market-specific client list.

Charles C. Fu and Eric Bloom have over 35 years of combined software design and development experience with high profile clients that include Viacom, CarsDirect.com, Path Communications, Pratt & Whitney, Sun Microsystems, Yamaha Music Corporation, LRN (The Legal Knowledge Company), and the Smithsonian Institute, to highlight just a few.

The Company's Mission

Web i18n's mission is to provide multilingual web-based content-management services to help real estate businesses compete in tomorrow's fast-changing and increasingly internationalized marketplace.

Web i18n is dedicated to building long-term relationships with clients by providing a suite of services of the highest quality at reasonable costs. Web i18n is focused on becoming known as the industry's premiere multilingual real estate web service provider.

Products and Services

Web i18n provides a complete suite of multilingual web services that include custom real estate web site development, applications development, language translation, web hosting, email, and content management.

A basic realtor web site package of services includes

- Initial web site design
- Web site hosting (100MB disk space and 3GB/month traffic)
- Domain name registration and renewals
- Web-based content management software which allows realtors to manage listings and updating selected information so that fluency in web languages such as Java and HTML is unnecessary; realtor can perform their own language translations
- Contact management features
 - Realtors have access to all information entered by buyers
 - Realtors can easily email to interested buyers
- Unlimited email accounts
- Virus filtering
- Spam filtering and marking

Optional services can result in significant additional revenue for the real estate agents. Optional services include

- Development of virtual tours of featured properties
- Language translation services
- Web site customization
- Web search engine submissions
